Dr. Al / Update 04.08.2008

Abbreviations:

A=Acaricide/F=Fungicide/
H=Herbicide/ I=Insecticide/ W=Growth
regulator / AN= Antibiotic

X = compatible / (X) limited compatibility only under constant agitation / N = not compatible

Immediate application after preparation generally recommended !

The indicated compatibilities only reflect the physical-chemical compatibility. Non-compatibility under lab conditions does not generally exclude applicability under field conditions !

The shown compatibilities do not replace our general recommendation to run an own compatibility test before use. This is particularly recommended when mixing several pesticide active ingredients.

Carefully read label recommendations of all pesticides used and observe current pesticide approval status relevant to your market !
